DANE MILLER, BIOMET CO-FOUNDER, RECEIVES PHOENIX LIFETIME ACHIEVEMENT AWARD

Warsaw, IN, October 27, 2009 -- Dane A. Miller, Ph.D., co-founder, former CEO, and current board member of Biomet, Inc., was named the 2009 Phoenix Lifetime Achievement Award winner. The Phoenix Award recognizes the career of an executive or entrepreneur whose efforts have led a company to a leadership position in the medical device and diagnostic industry.

Dr. Miller was honored at Phoenix 2009, “a medical device and diagnostic conference for chief executive officers that explores key issues facing the industry,” according to Wilson Sonsini Goodrich & Rosati, which co-founded the event, along with PricewaterhouseCoopers, Elsevier Business Intelligence and Versant Ventures.

Jeff Binder, Biomet President and CEO, stated: “We’re very proud of Dane for receiving this high honor. His contributions extend well beyond the success he achieved at Biomet. He has been an influential leader in the medical device industry, the business world, and the philanthropic world. We congratulate Dane on this well-deserved recognition.”

Among his various memberships and honors, Dr. Miller is a fellow of the National Academy of Engineering, and a member of the Shands Circle of the Orthopedic Research and Education Foundation. He serves as a board member of the University of Chicago Health Systems and Kettering University, and is a member of the Board of Trustees of the World Craniofacial Foundation and the University of Cincinnati Foundation. He and his wife formed the Dane and Mary Louise Miller Foundation, which supports various philanthropic activities.

About Biomet

Biomet, Inc. and its subsidiaries design, manufacture and market products used primarily by musculoskeletal medical specialists in both surgical and non-surgical therapy. Biomet’s product portfolio encompasses reconstructive products, including orthopedic joint replacement devices, bone cements and accessories, autologous therapies and dental reconstructive implants; fixation products, including electrical bone growth stimulators, internal and external orthopedic fixation devices, craniomaxillofacial implants and bone substitute materials; spinal products, including spinal stimulation devices, spinal hardware and orthobiologics; and other products, such as arthroscopy products and softgoods and bracing products. Headquartered in Warsaw, Indiana, Biomet and its subsidiaries currently distribute products in approximately 90 countries.
